## SM-1100/1500/1600 Rotary Actuators

Rotork Process Controls designs and manufactures high quality, durable actuators designed for trouble-free performance under the most demanding conditions.

The SM-1100, SM-1500 and SM-1600 Series are multiturn, rotary actuators, designed to meet the exacting requirements for closed-loop modulating positioning control. They can be applied to valves, metering pumps, hydraulic and pneumatic pressure regulators, dampers, and many more industrial/process control applications where reliable remote positioning control is required.

The gearing is totally enclosed, permanently lubricated. The actuator housing may be NEMA 4 Watertight or Explosion proof rated for Class I, Division 1, Groups C, D and dust ignition proof Class II, Division 1, Groups E, F, G Hazardous Locations.

## Features

- Torques from 3.5 to $1,000 \mathrm{lbf}$.in ( 6 to 131 Nm ).
- Rotation 40 degrees to 324 turns.
- Modulating duty: 2,000 starts per hour.
- Manual override option.
- Watertight IP-65 and explosion proof enclosures.
- AC input power (single-phase) or DC input power versions.
- Temperature range from -40 to $150^{\circ} \mathrm{F}\left(-40\right.$ to $\left.65^{\circ} \mathrm{C}\right)$.
